AUTHOR INDEX VOLUME 1 (1983/1984)

The issue number is given in front of the page numbers

Abolnikov, L., A single-level control in Moran's problem with feedback (1) 16– 19
Axsäter, S., State aggregation in dynamic programming—An application to scheduling of independent jobs on parallel processors (4)171–176
Balas, E. and P.R. Landweer, Traffic assignment in communication satellites (4)141–147
Barahona, F., The max cut problem in graphs not contractible to K_5 (3)107–111
Barahona, F., On some weakly bipartite graphs (5)239–242
Benders, J.F. and J.A.E.E. van Nunen, A property of assignment type mixed integer linear programming problems (2) 47– 52
Błażewicz, J. and K. Ecker, A linear time algorithm for restricted bin packing and scheduling problems (2) 80– 83
Bond, V.R., *see* B.R. Feiring (1) 1– 6
Bricker, D.L. and J. Rajgopal, Yet another geometric programming dual algorithm (4)181–185
Charnes, A., W.W. Cooper, L. Seiford and J. Stutz, Invariant multiplicative efficiency and piecewise Cobb-Douglas envelopments (3)101–103
Chauny, F., M. Chokron and A. Haurie, Nursing care demand prediction based on a decomposed semi-Markov population model (6)279–284
Chokron, M., *see* F. Chauny (6)279–284
Cook, W., Operations that preserve total dual integrality (1) 31– 35
Cooper, W.W., *see* A. Charnes (3)101–103
Deuermeyer, B.L. and D.K. Friesen, A linear-time algorithm for classifying the states of a finite Markov chain (6)297–301
Ecker, K., *see* J. Błazewicz (2) 80– 83
Einbu, J.M., A weak linearization of the Kuhn–Tucker conditions for a class of allocation problems (3)112–114
Farrell, R.L., *see* S.M. Pollock (6)261–264
Feiring, B.R., D. Fielder and V.R. Bond, An optimal packing problem for satellites in geosynchronous orbit (1) 1– 6
Fielder, D., *see* B.R. Feiring (1) 1– 6
Filar, J.A., Pecentiles and Markovian decision processes (1) 13– 15
Filipiak, J., Diffusion-equation model of slightly loaded $M/M/1$ queue (3)134–139
Frost, F.G., Minimizing total expected costs in the two-machine, stochastic flow shop (2) 58– 61
Friesen, D.K., *see* B.L. Deuermeyer (6)297–301
Gibby, F., F. Glober, D. Klingman and M. Mead, A comparison of pivot selection rules for primal simplex based network codes (5)199–202
Glober, F., *see* D. Gibby (5)199–202
Glynn, P.W., On confidence intervals for cyclic regenerative processes (2) 66– 71
Hamacher, H.W., J.-C. Picard and M. Queyranne, On finding the k best cuts in a network (6)303–305
Hartley, R., *see* L.C. Thomas (2) 72– 76
Haurie, A., *see* F. Chauny (6)279–284
Hornung, R., An efficient algorithm for solving the discrete minisum problem (3)115–118
Ibaraki, T., *see* N. Katoh (2) 62– 66
Iversen, V.B., Decomposition of an $M/D/r \cdot k$ queue with FIFO into k $E_k/D/r$ queues with FIFO (1) 20– 21
Jarvis, J.P. and D.E. Whited, Computational experience with minimum spanning tree algorithms (1) 36– 41
Jonker, R. and T. Volgenant, Transforming asymmetric into symmetric traveling salesman problems (4)161–163
Judah, S. and W.T. Ziemba, Three person baccarat (4)193–194
Katoh, N. and T. Ibaraki, A polynomial time algorithm for a change-constrained single machine scheduling problem (2) 62– 66
